

Union Catalog Committee
Meeting Notes – March 23, 2016

X	Jamie Walker [Chair]	CMU
X	Mary Walsh & Nicole Trujillo	Adams State
	Gail Owens	Basalt
X	Emily Veenstra-Ott	Bud Werner
X	Gail Nottingham & Charlene Walker	BVPL
X	Karen Neville	CCU
X	Amy Currier	CMC Glenwood
	Chris Bockstiegel	CMC Leadville
	Jonathan Beam	CMC Steamboat
X	Diane Levin & Jolanda Durbin	EVLD
	Selene Gardner	EPL
X	Jen Pack & Martha Talman	Ft. Lewis
X	Amy Shipley	Garfield Co
	Sarah Greenberg	Grand Co
	Jennifer Hillebrandt	Gunnison

X	Betsey Dick	MCPLD
X	Shelly Fratzke	SD#51
	Judy Poe & Wendi Weinstein	Pine River
X	Carol McArdell	PCL
	Debbie Barnes & Maggie Hindley	Rampart LD
	Becky Nelson & Kristin Trombo	Salida
	Sarah Nordholm	Summit Co
	Jo Norris	VPL
X	Nicole Becwar	WSCU
	Amy Sieving	WPL
X	Nancy Lindwedel	Marmot
X	Lloyd Chittenden	Marmot
	Brandon Cole	Marmot
X	Mark Noble	Marmot
	Jimmy Thomas	Marmot

BIBFRAME DISCUSSION/Linked Data:

Mark – Asked for knowledge base from each member on the call.

Amy Shipley – Zepheira class, familiar with Denver Public Library usage of linked data.

Amy Currier – No background although she has done independent research.

Betsey Dick – Took Zepheira class

Karen N. – Took Zepheira class and is familiar with DPL usage.

Diane & Amy – have background similar to Amy S.

Gail N. – No background

Jo – Attended training

Jolanda – No specific training

Necole B. – Researched but not strong knowledge

Jamie – Basic knowledge

Shelly – Basic knowledge

Lloyd – Attended Zepheira training

Mark – creative work/properties/relationships, less text, more textural representation.

Archives project – link to Wikipedia, genealogy.

LTI – issue relying on “text-based matching” – Authority finds misspelling, sends back to correct.

Lloyd – Learned at IUG that linked data URIs are available from authority vendors such as Backstage

LTI is waiting for Library of Congress to tell them what to do.

Mark – Some libraries are putting linking info (URIs) into \$0 sub-field in MARC records.

Mark –

1. Replacement for marc records with bibframe – update linked data
2. How to make library records discoverable – waiting for III to download bibframe data.
Google doesn't care about bibframe – search for linked data – schema.org
Site map may be doable for Pika
3. Link data & marc mashup – 100 field, 0 subfield – link data source for titles we don't have.
Link to VIAF database – Zepheira

Amy – Publish holdings in bibframe, link to each other, Google recognizes links

Mark – starting Google prefers schema.org – have library – schema.org

LibHub link to the bibframe link. Google relying solely on schema.org. Pika admin – has links, define authors for individual building locations.

Jamie – prominence – sidebar

Mark – It's Google's choice

Shelly – wants results for student holds only

Nicole – uses Book Scholar, linked to journal resources well, but books do not, link to OCLC book data

Mark – maybe give better data to Google?

Amy – What can we do next?

Mark – replace marc record with bibframe, wants to work on display and enhancement, i.e. author info, etc.

Logan/JT/Mark – Author info enhanced in Pika

Mark & ATI – Overdrive easy to add in a couple months, have linked data and authors.

Next, do we populate marc records with linked data info?

Timeline unknown

Triple store – store links and where they link to.

UCC – Something we want to do, look into this, does overlay affect link to authorities, UCC, discovery partners, etc.

Karen N. – How do we push linked data as Mark's priority?

Mark – has no positive date

Lloyd – exploring what vendors can do, LTI? Populate marc records with linked data

Amy – Talking about Mark's recommendation for what UCC can be doing

Shelly – can subfield 0 be protected so it's not overlaid

Lloyd – you would have to protect the whole thing – field 100.

May be able to do it in Pika or Triple Store instead of Sierra.

Amy – follow up – what are members thinking about doing.

Lloyd – avoid jumping ahead, spending money, changing standards

Jamie – labor intensive – maintenance

Amy – LibHub maintenance, labor, time is minimal

Mark – no new labor since we already have data.

Shelly – supports Mark

Marmot does work, no outside vendors, etc.

LibHub up for about a year, not renewing contract with Zepheira, we can use Marmot linked data instead.

***Lloyd** – ask Logan MacDonald to attend next UCC meeting, possibly 30-45 minutes, including Q&A

***Nicole Becwar** – Give examples to Mark of books that aren't linking from Book Scholar

Please send agenda items for next month's UCC meeting to Jamie/Lloyd.

Next Meeting April 20, 2016
